1 WHS0170 Location Groups Generation

This is the *Location Groups Generation* screen (*WHS0170*).

The following fields document the parameters for generating location groups:

| Field Name | Description |
|--------------------------------------|---|
| <i>Aisle Code</i> | The unique identifier for the aisle where groups are to be generated. |
| <i>Bay From</i> | The starting bay number for the generation range. |
| <i>To</i> | The ending bay number for the generation range. |
| <i>Number of Bays</i> | The number of bays that should be included in each generated group. |
| <i>Max Weight</i> | The maximum weight capacity allowed for each generated group. |
| <i>Horizontal or Vertical</i> | A dropdown menu to define the orientation of the groups being generated. |
| <i>Exclude Floor Level Locations</i> | Radio button selection (Yes/No) to exclude locations at floor level from generation. |
| <i>Select Bay Locations</i> | Radio buttons to specify which bays to include: <i>Odds</i> , <i>Evens</i> , or <i>Both</i> . |
| <i>Action Buttons:</i> | |

- **Find:** Locates the locations corresponding to the specified parameters.
- **Generate:** Executes the creation of the Location Groups based on the defined settings.
