LZF-00000001 LZF-00000002 LZF-00000003 LZF-00000004 LZF-00000005 LZF-00000006 LZF-00000007 LZF-00000008 LZF-00000009 LZF-00000010

Select All De-Select All

The serial numbers can be entered by entering a range of serial numbers and then using the 'Create Range?' button or by entering individual serial numbers.

The Tick boxes can be used to select serial numbers. A total expected and a total entered will display the total serial numbers entered.

This screen will include a scrollbar and display a single column of serial numbers. This will allow us to display error messages next to any serial numbers that fail validation. The new screen layout is displayed above.

Button functionality

Button	Description
Create Range	To create a range of serial numbers.
Delete Range	To delete a range of serial number.
Delete Selected	To delete any selected serial numbers.
Re-sequence	To re-sequence the serial numbers into numeric sequence.
Reset	To restore the original set of serial numbers.
Confirm	To confirm all serial numbers have been entered and return to the calling screen.
