1 WHS0549

This is the *Stock Take Tolerances* screen (*WHS0549*).
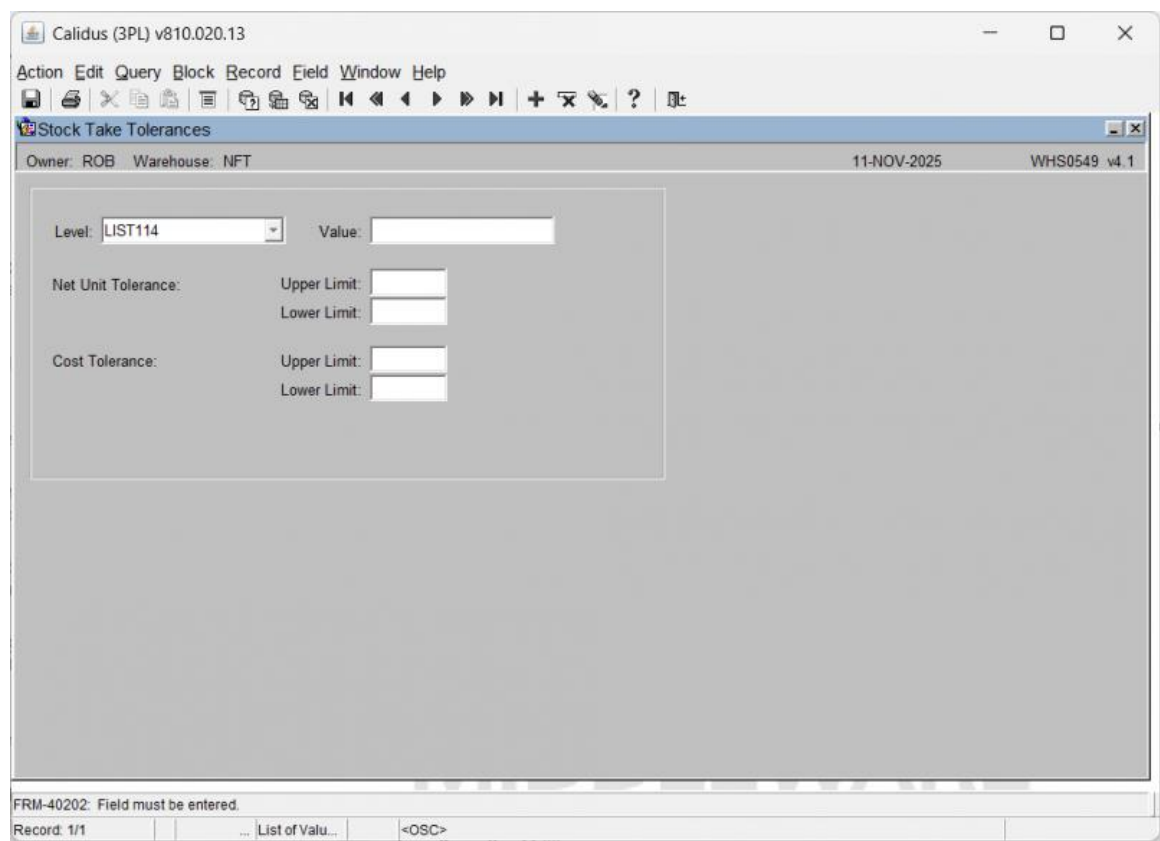

The following fields document the parameters for defining and setting stock take tolerances:

Field Name	Description
Level	A dropdown selection defining the level at which the tolerance applies (e.g., LIST114).
Value	A specific value associated with the selected Level.
Net Unit Tolerance: Upper Limit	The maximum allowable variance in net units before a tolerance breach is flagged.
Lower Limit	The minimum allowable variance in net units before a tolerance breach is flagged.
Cost Tolerance: Upper Limit	The maximum allowable variance in cost before a tolerance breach is flagged.
Lower Limit	The minimum allowable variance in cost before a tolerance breach is flagged.
