Details

Configure

You can select data by location, use type, bonded flag and location type.

When selected, the screen will display the results in the table below. The table may be scrolled horizontally to display more details.

You can see more details of the records by selecting a line and then clicking the **Details** button provided. This will take you to the Stock Location Enquiry details of the Configurable Stock Location Enquiry screen [WHS0900](#).

The fields displayed in the results table may be configured using the **Configure** button provided. This will display the configuration screen WHS0909.

This screen allows you to specify which fields should be displayed, their sequence and the width that will be displayed in the Stock Location Enquiry form, giving a more user friendly look.

The screen will show all configurable elements for the screen being configured. For example, if this is configuring the columns shown on results from WHS0917, this will be shown in the program ID on the top right.

The screen consists of two tables:

- Shown columns
- Available but not shown columns.

The arrow buttons allow you to select which fields you require and then to sequence the fields within the display. It is then possible if required to enter into the Width field and set the length of individual fields to save on the displayed space.

When finished, save your configuration and close the screen.
