1 WHS1730 Pick Discrepancies

Here you can manage pick discrepancies.

This screen works similarly to the pick confirmation screen [WHS1714](#).

First, find an order by entering the Owner and Order Number - LOVs are provided.

Click the **Find** button and pick line details will be shown.

Here you can

- View the order line details, Picker and Checker of any line. Select the line and view in the right-hand panel.
- Set the *Picker*, *Checker*, *Pick Date*, *Start* and *Finish* times of all lines using the **All Pick Details** button.
- Reprint the pick list with the **Reprint PL** button.
- **Confirm** the order lines.
