# 1 WHSORA031 File Upload

This is the *File Upload* screen (*WHSORA031*).

The following fields document the parameters for uploading a file into the system:

<b>Field Name</b>	<b>Description</b>
<i>Pathname</i>	The local or network path where the file is located.
<i>Filename</i>	The name of the file to be uploaded.
<i>Load Type</i>	A dropdown menu to specify the type of data being uploaded. Available options include: <i>Customers</i> , <i>EDI</i> , <i>Holds</i> , <i>Location Update</i> , <i>Med Translation</i> , <i>OMS Postcodes / Warehouse search</i> , <i>PPP Orders</i> , and <i>Purchase Order</i> .
<i>EDI Format</i>	The format/standard of the EDI file being uploaded.
<i>Processing Flag</i>	A flag to control how the system processes the uploaded data.
<i>Return Message</i>	A system field to display the status or outcome of the upload process (Display only).
<i>Updated</i>	A system field to show the number of records successfully updated (Display only).
<i>Errors</i>	A system field to show the number of errors encountered during processing (Display only).

When the file is selected, click **Load Data**. The system will process your file and return the messages and status in the last 3 fields above.
